Increasing energy efficiency globally is one of the most promising ways to tackle climate change. The countries of South-East Europe are challenged with numerous economic and environmental problems caused by their inefficient and polluting industries. However, these problems present an opportunity for a significant increase in energy efficiency and RES application as a way of reduction of greenhouse gas emissions.

Focused on these hot issues for the Region, the 7th edition of the South-East European EE & RES Congress and Exhibition will showcase again the latest equipment, technology and services from the energy sector and will attract the public and business attention to the benefits of renewable energy use and the different means for energy saving.

EXHIBITION 2011

The exhibitors will display their state-of-the-art products, solutions and services in the renewable energy and energy efficiency sectors to key players and decision makers from the South-East European Region.

- 5 months prior to its opening there are already booked areas for National participation of Spain and group participations from Austria, China, Finland, Slovenia and the USA;

- There are interested to exhibit companies from Belgium, Germany, Italy, Poland, Turkey, Switzerland; Some of the leading manufacturers and service providers that have already booked their stands, are: **Enercon**, Germany; **Fronius**, Austria; **Global Wind Power**, Denmark; **Phono Technologies**, Switzerland; **Franki Grundbau**, Germany, **Eurosol**, Germany; **Hyundai Heavy Industries** and **Siemens**, Bulgaria.

- NEW SERVICE: Upon request up to 5 matchmaking meetings for each exhibitor will be offered as a value-added opportunity at no additional cost. The meetings will be arranged by the Organizer Via Expo in special, pre-scheduled 30-minutes one-on-one appointments.

CONGRESS 2011

Participants will make face-to-face contacts with representatives of institutions and public administration, managers, investors and industry professionals.

They will learn about the latest trends, get acquainted with expert analyses and forecasts.

HIGHLIGHTS:

- Reducing the Barriers Holding Back the RES Installations Development
